Language Deprivation and Early Intervention

A. Researcher and B. Scholar

https://doi.org/10.1093/deafed/enz012

Language deprivation in early childhood has measurable consequences for reading, theory of mind, and academic outcomes. This note summarises the intervention window and what families can do inside it. Language deprivation in early childhood has measurable consequences for reading, theory of mind, and academic outcomes. This note summarises the intervention window and what families can do inside it.

Methods

Language deprivation in early childhood has measurable consequences for reading, theory of mind, and academic outcomes.
